www.supertimer.com

SuperTimer provides complete Pinewood Derby support.

Use us as your source for  
Pinewood Tracks, Timers  
and Race Management Software

## SuperTrack

SuperTrack is a unique ABS plastic track that easily assembles without tools. It is incredibly durable as well as lightweight (about 1/2 the weight of a wood or aluminum track) and is shipped in a strong polypropylene box that is ideal for transport and storage—it's only 7' long, 8" wide and 8" high. Two boxes are used with six-lane tracks.

SuperTrack comes with a slide-in starting gate, a car-catching memory foam garage, a plug together ramp/stand and ten US flags. Each section is 7' long and two lanes wide for easy handling. A five-minute installation video makes assembly a snap. It's available in 4 or 6 lanes with lengths of 35, 42 or 49 feet, in Titanium (our newest color), Yellow, Blue, or split in two-lane increments. Lanes are numbered with large decals at both the start and finish.

## SuperTimer II

SuperTimer II is a self-contained, precision timer especially designed for Pinewood Derby Racing. It

automatically announces the times and/or places of each lane in a heat. It includes a solenoid activated start function so that each racer can start a heat. And, SuperTimer II features solid-state finish line sensors, which don't obscure the view and do eliminate the nagging problems associated with photo or infrared detectors. SuperTimer II is available for 3 to 6 lanes and includes RaceManager software. Since it speaks, everyone can hear the results.

## RaceManager

RaceManager is a Windows program that manages your Pinewood Derby Race. It connects to SuperTimer II through a USB port and interacts with SuperTimer II to schedule and manage a fair race with lots of winners. All cars run the same number of races. No one is 'eliminated.' RaceManager can

create Teams, such as Dens or Patrols, and produce an overall Team winner as well as results within each team. Its unique speed-matched scheduling means lots of close races with no one eliminated. Use your video projector to show the racers' names and heat results on a wall!

## Philosophy

At SuperTimer, we keep in mind our answer to the question, "What's the purpose of the Pinewood Derby?" We don't think the answer is, "To find a winner." Rather, we think the purpose of the Pinewood Derby is, "To provide a positive experience for the organization, the parent and the child." (With emphasis on the child.)

We try to think like an 8 year old. [Some would say we succeed even when we don't try!]

Would an 8 year old like to be eliminated?

Would an 8 year old like to run only twice, losing both times?

What would an 8 year old do (and get in trouble doing) once he was eliminated or waiting to race?

How would an 8 year old feel if he lost in a slow lane?

All of our products are designed to eliminate those kinds of problems and, as we said, "To provide a positive experience for the organization, the parent and the child." (With emphasis on the child.)

## Pricing

Prices valid thru 6/30/2020

### SuperTimer II
